

ADVANCED MARRIAGE TRAINING FOR SINGLES

Many of today's Christian singles, who follow their quest for marriage, begin with a selection of a mate, then premarital counseling, and finally marriage. By the time a couple reaches the premarital stage, little will stop them from getting married. Marriage can be long lasting and satisfying for the man and woman. However, the fifty percent of couples who get divorced would disagree that marriage is beneficial.

In order to reverse this trend we must better equip single adults who desire marriage. The principles in Dr. Campbell's book, *'Leading Your Marriage into the Promised Land'* form the principles for the Advanced Marriage Training for Singles Seminar. We equip singles for marriage by teaching the important principles that will sustain unity in the marriage.

LEARNING OBJECTIVES

Singles will learn:

- Root causes of a dysfunctional marriage
- To incorporate teamwork into their future marriage
- Develop a greater bond between them and their future spouse
- Enhance communication between them and their future spouse
- Reduce potential conflict between them and their future spouse
- To develop a marriage founded on biblical principles
- To take proactive steps to enhance their marriage
- How to correlate their spiritual gift to their purpose for their future marriage

SEMINAR OVERVIEW

During this seminar, singles become aware of the characteristics of dysfunctional marriage. Singles learn to use a reflective tool that can reduce tension and disagreements between the husband and wife. Participants also receive training that results in the husband and wife working together as a team to develop a family shared vision and family goals based on biblical principals and the individual values that the husband and wife bring to the marriage. They also learn their purpose as it correlates to their spiritual gift(s).
